## Personal Care Fragrances

### *Enhancing your experience*

Fragrances in personal care products provide pleasant scents and can make products more recognisable. Not only do fragrances mask the base odour of the formula, they also inspire the user's mood, induce emotional effects, inspire the user's imagination and provide a perception of product quality.

Often the personal products we love to use are because of the fragrance, in addition to the quality. The fragrance component can drive brand loyalty and product recommendation.

Find inspiration for your products with our personal care fragrance range. These are some of our popular fragrances. Please enquire at [sales@azurefragrances.co.za](mailto:sales@azurefragrances.co.za) for custom fragrances or if you would like us to match your current fragrance.

## Essential Oils

### *Enhancing your experience*

Essential oils are volatile plant extracts made from steam distilling or cold-pressing flowers, bark, stems, leaves, peel, roots, seeds, resins, or other parts of a plant. Unique aromatic compounds give each essential oil its characteristic essence.

Essential oils can scent your home or freshen fabrics. They are also used as a natural scent in personal care products such as lotions and soaps. Essential oils also act as a safe and environmentally friendly alternative to man-made mosquito repellents. Studies have shown that some oils, such as citronella, may repel certain types of mosquitoes for around 2 hours. Protection time may be extended up to 3 hours when it's used in combination with vanillin.
